Four Private and Secure Charging/Logistics Pods

Key Features

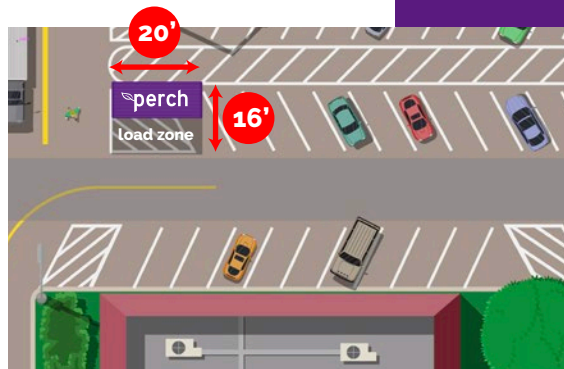

3kW of electrical power per pod. Enough to charge up to 21 micromobility vehicles at once. Unlimited use included.

Drive-up access. Van to cable—under 6 feet.

Built for easy loading and unloading with proprietary Perch racks and retractable charging cables.

Space Required to Operate

The portal has an 8'x 20' footprint and must be placed in proximity to 240V power. Another 8'x 20' loading and unloading area is recommended for optimal use.

State Certified
Commercial-Modular Structure.

Multiple Configurations Available

Scooter Charging

Battery Swap

Last-Mile Logistics

See Details on Page 2 ...
